Answer to Riddle: All the people were married

Quote Of the month!

“Whatever the new month is bringing for you, be it good or bad; always keep that smile on your face no matter what.”

Fact of the month!

Canadians say “sorry” so much that a law was passed in 2009 declaring that an apology can't be used as evidence of admission to guilt.

Joke of the month!

“Why should you always knock on a refrigerator door before opening it?”

(See answer at bottom of the page)

Riddle of the month!

You see a boat filled with people. It has not sunk, but when you look again you don't see a single person on the boat. Why?

(Answer on last page)

EXPLORE DIVERSITY AND EQUITY

A culture of social inclusion starts with you. We can all take steps towards a more diverse and equitable society. **Lambton College is offering 8 online, one-hour mini-courses at NO COST!** Courses include:

- A Brief Introduction
- Acknowledging Unconscious Bias
- Ageism
- Disability Justice
- Feminism
- Intercultural Awareness
- LGBTQ Identities
- Mental Health

You've been identified as a close contact of someone who has tested positive for COVID-19 or someone with COVID-19 symptoms. Now what?

This guidance does not apply to individuals who live, work, volunteer or are admitted in a highest risk setting (hospitals, Long-Term Care, retirement homes, congregate living settings)

Wear a well-fitted mask in public, physical distance and maintain other public health measures for 10 days following your last exposure if leaving home. You should **NOT visit any highest risk settings* or individuals who may be at higher risk of illness (i.e. seniors or immunocompromised) for 10 days from your last exposure.

WATCH YOUR ASHES

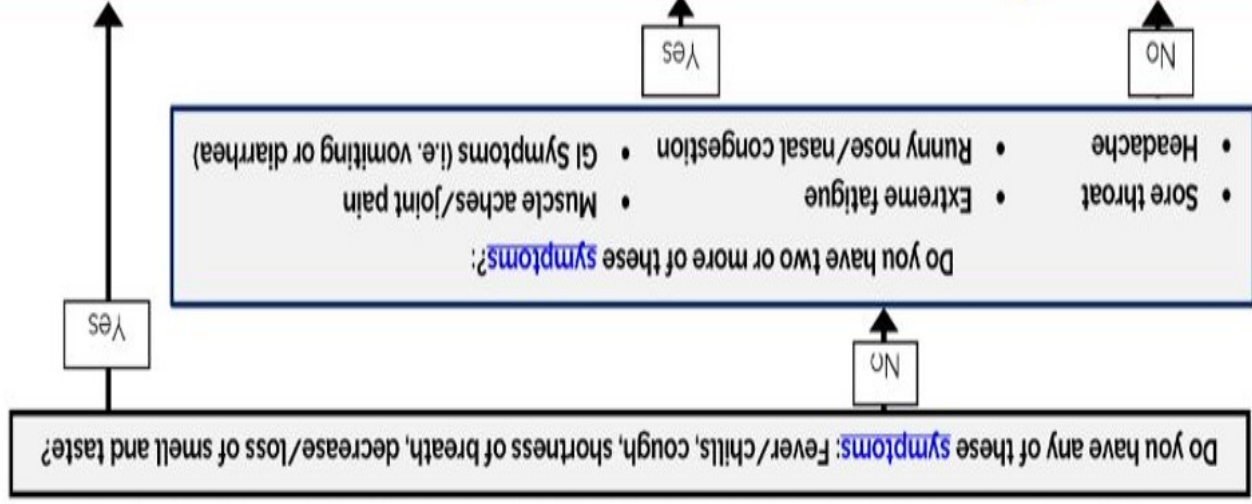

Allow the ashes from your woodstove or fireplace to cool before emptying them into a metal container with a tight fitting lid.

Keep the container outside.

You have symptoms and are concerned you may have COVID-19. Now what?

This guidance does not apply to individuals who live, work, volunteer or are admitted in a highest risk setting.

<ul style="list-style-type: none"> • It is highly likely that you have a COVID-19 infection. • You must self-isolate immediately: <ul style="list-style-type: none"> ◦ For at least 5 days (if fully vaccinated or under 12 years old) or 10 days (if not fully vaccinated or immunocompromised) from your symptom onset and until you have no fever and your symptoms have been improving for 24 hours (or 48 hours if gastrointestinal symptoms), whichever is longer in duration • All of your household members (regardless of their vaccination status) must self-isolate while you are self-isolating. • Most individuals do not need a COVID-19 test. If you are in the eligible individual list, get a PCR test, rapid molecular test or rapid antigen tests (if you have access). If testing is not available, you must fulfill the self-isolation. • If your symptoms worsen, seek advice from Telehealth or your health care provider. • Notify your workplace. 	<ul style="list-style-type: none"> • It is less likely that you have COVID-19 infection. • Self-isolate until your symptoms are improving for at least 24 hours (48 hours for gastrointestinal symptoms) • Your household members do not need to self-isolate.
--	---

Highest risk settings include hospitals (including complex continuing care facilities and paramedic services) and congregate living settings, including Long-Term Care, retirement homes, First Nation elder care lodges, group homes, shelters, hospices and correctional institutions.

Note: Symptoms should not be related to any other known causes or conditions. See the [COVID-19 Reference Document for Symptoms](#) for more information.

Maintain your alarm.

Test your smoke alarms regularly by pressing the "test" button. Follow the tips below to ensure your family is always protected.

Replace batteries regularly. Change your batteries when you change your clocks in the spring and fall. When the warning chirp sounds, indicating your battery is low, replace it immediately. Never wait.

If you think your smoke alarm is more than 10 years old, replace it. Smoke alarms wear out. A hassle and worry free way to update smoke alarms is to install 10-year-battery smoke alarms. These easy, enduring alarms offer decade-long protection.

Clean your smoke alarms. Dust can clog a smoke alarm. Gently vacuum alarms every six months using a soft brush. Never vacuum electrically-connected alarms unless you shut off the power. Test your unit when finished cleaning.

Plan your escape. Make sure that everyone knows the sound of the smoke alarm and what to do when it activates. Create an escape plan and practice it with the entire household. Once outside, call the fire department from a neighbour's home. Never re-enter a burning building.

Smoke alarms that are properly installed and maintained play a vital role in reducing fire deaths and injuries. If there is a fire in your home, smoke spreads fast and you need smoke alarms to give you time to get out.
